Superior options for maximum control

Pulsavac® Plus Family

The *Pulsavac*® Plus, *Pulsavac* Plus LP and *Pulsavac* Plus AC wound debridement systems offer versatile solutions to wound irrigation, wound cleaning and therapy. Three models, featuring lightweight design and trigger-controlled pressure settings, offer a powerful cleaning action for bone or a gentle lavage for soft tissue. Concurrent suction and irrigation help to thoroughly remove debris and contaminants without flooding the field. The *Pulsavac* Plus and *Pulsavac* Plus AC are systems for use in orthopaedic and trauma cases. The *Pulsavac* Plus LP provides gentle lavage for soft tissue debridement.

Tip Retaining Mechanism

provides a positive lock for secure attachment of tips.

Textured Surface

near tip to help provide a sure grip and firm control, even in awkward positions.

Rocker Switch

provides convenient pressure control at your fingertips.

Textured Pistol-Grip Handle

provides a secure, comfortable grip to facilitate control.

Ergonomic, Lightweight Design

fits comfortably into the palm of your hand facilitating use in tight areas.

Independent Fluid and Suction Tubes

provide concurrent fluid delivery and suction.

Power In Your Hands

The Pulsavac Plus and Pulsavac Plus AC systems are ideal for use in the operating room and orthopaedic surgery applications. High power helps to effectively clean bone and cement debris during total joint procedures. Special tips were specifically designed for knee and hip procedures.

THREE PULSAVAC PLUS MODELS AVAILABLE

Pulsavac Plus •

Combines convenience and power for smooth, efficient pulsative irrigation and debridement. The external battery pack hangs outside the sterile field, and the variety of tips and trigger-controlled pressure offers either powerful cleaning or gentle lavage. The primary application site is the operating room for orthopaedic surgery. *Pulsavac Plus* operates on eight AA batteries.

Reusable AC Adapter eliminates the need for alkaline batteries, reducing the amount of waste.

Pulsavac Plus AC •

An environmentally-friendly option. The reusable AC Adapter Power Pack must be purchased separately. This system completely eliminates the need for alkaline batteries.

Pulsavac Plus LP •

This low pressure system delivers an adjustable, gentle lavage for wound cleaning and therapies and is an excellent alternative to traditional whirlpool therapy treatments. Primary application may occur in the OR, ER, wound care clinics, nursing homes or long-term care facilities. Therapy can be done in the patient's room or at the patient's home.

Low Pressure Debridement Tip Only

00-5150-186-00 Flexible Tip, 10.5 inch length

DEBRIDEMENT TIPS AVAILABLE

Debridement tips include the dual-cone splash shield, designed to minimize splashback and help control the dangers associated with translucent spray.

The color coded dots to the left of the tips indicate system compatibility.

00-5150-175-00 High Capacity Fan Spray w/Splash Shield, 12.7cm length
